SUMMARY

01

NON RETURN CHECK VALVES

Swing Check valve CV
Swing Check valve CS
Disc check valve DCEL
Dual Plate Check valve
Counterweight check valve CC

02

BUTTERFLY VALVES

Butterfly Valve series BV/BVT
Butterfly Valve series BR/BRT
Butterfly Valve series VFI
Butterfly Valve series BVS
Butterfly Valve series CH
Butterfly Valve series DV0-2 DV4

03

SIGHT GLASSES

Sight Glasses series S, W, R

04

BALL VALVES

Trunnion Ball Valve TV

01

NON RETURN CHECK VALVES

SERIES CV CLAPET VALVE

In compliance with PED 97/23/EC

TECHNICAL DETAILS

Wafer design	Metal/metal seat or soft seal (NBR, EPDM, PTFE, FKM)
Self-centering	Series DN 32 - DN 800
Light weight and small face to face	Suitable for flange UNI PN 6, 10, 16, 25 e ANSI 150 RF
Low pressure drop	Further materials and special execution upon request: - series ANSI 300 + ANSI 1500 RF e RTJ - series PN 40 + PN 250
Easy to install and maintenance	
Standard materials: zinc plated carbon steel, stainless steel 316, alu-bronze	

WORKING PRESSURE

PN6	6 Kg/cm ²	85 Psi
PN10	10 Kg/cm ²	142 Psi
PN16	16 Kg/cm ²	227 Psi
PN25	25 Kg/cm ²	355 Psi
ANSI150	20 Kg/cm ²	284 Psi

MINIMUM OPENING PRESSURE (mbar)

Flow Direction	DN 32 : DN 150	DN 200 : DN 300	DN 200 : DN 300
Horizontal open 10° →	3	3	6
Horizontal open 30° →	9	12	16
Horizontal open 60° →	13	19	26
Vertical unphill ↑	16	22	32
Vertical downhill ↓	-	-	- <i>It is not possible to use the valve in this position</i>

SERIES DCEL DISC VALVE

TECHNICAL DETAILS

Wafer design	Series DN 15 - DN 100
Self-centering	Suitable to be insert for flanges PN 6, 10, 16, 25, 40, ANSI 150, ANSI 300
Low pressure drop	Working pressure MAX 20 Bar
Easy to install and maintenance	For higher pressure please contact our offices
Can be installed on vertical pipelines with downhill flow	PTFE disc, special materials, calibrated spring upon request
Materials: acciaio inox AISI 316	
Metal/Metal seat, soft seat upon request

SERIES CD TWIN FLAP VALVE

TECHNICAL DETAILS

Wafer design, Lug and double flanged upon request	Suitable for flanges UNI PN 10-40 ANSI 150-600
Self-centering	Face to face according to EN 558 - 1,16
Low pressure drop	Pressure test conform to API 598
Metal/metal seat EPDM - VITON - BUNA	Special executions upon request
Materials: zinc plated carbon steel body; stainless steel AISI 316, discs in AISI 316L/CF3M	
Series DN50 - DN 500

TECHNICAL DETAILS

PRESSURE DROP CHART

The chart is valid for water at 20°C; for other fluids, the equivalent water volumeflowrate must be calculated and used in the chart.

$$\dot{V}_w = \dot{V} \cdot \sqrt{\frac{\rho}{1000}}$$

$\dot{V}_w$ = Equivalent water volume flow in [l/s] or [m³/h]

ρ = Density of fluid (operating condition) in [Kg/m³]

$\dot{V}$ = Volume flow of fluid (operating condition) in [l/s] or [m³/h]

FLOW CHARACTERISTICS			OPENING PRESSURES

SERIES CC COUNTERWEIGHT CHECK VALVE

[Back to summary](#)

www.meivalvole.it
info@meivalvole.it

TECHNICAL DETAILS

Wafer design	Materials: zinc plated carbon steel, stainless steel 316
Self-centering	Metal/metal seat or soft seals
Light weight and small face to face	Series DN 300 - DN 800
Low pressure drop	Suitable for flanges EN 1092-1:2001 PN 6, 10, 16, 25 and ANSI 150 RF
Easy to install and maintenance	

WORKING PRESSURE

PN6	6 Kg/cm ²	85 Psi
PN10	10 Kg/cm ²	142 Psi
PN16	16 Kg/cm ²	227 Psi
PN25	25 Kg/cm ²	355 Psi
ANSI150	20 Kg/cm ²	284 Psi

WORKING PRESSURE

The main characteristic of this valve is the regulation of the opening pressure which can be set considering the working conditions of the valve itself.

BUTTERFLY VALVES

SERIES BV/BVT BUTTERFLY VALVE

TECHNICAL DETAILS

Alimentary silicon seat, EPDM seat or PTFE shell with internal silicon seat or EPDM seat	Other finishing: electro-polished or upon request
SS 316L body and disc	Wide range of accessories
Easy to install, easy to clean	All valves can be equipped with pneumatic actuators, proximity limit switches and solenoid valves
Standard series DN 100 - DN 400	
Standard finishing: internal mirror polished (Ra<0,1), external satin finish (Ra<0,8)	

Components of Silicon and EPDM valves are not interchangeable with those in PTFE

SERIES CH BUTTERFLY VALVE

TECHNICAL DETAILS

Wafer design	Standard series DN 100 - DN 500
Easy to install	Suitable for flanges UNI PN 10
Materials: AISI 316L	Machine finish
Transparent silicon seat, EPDM seat, or PTFE shell with internal silicon or EPDM seat with internal silicon seat	Favourable quality/price

Components of Silicon and EPDM valves are not interchangeable with those in PTFE

ACCESSORIES

Available upon customers' request, valves' accessories.

COLLAR CW

COLLAR TC

CLAMP SS304

SERIES DV0-2 DV4 BUTTERFLY VALVE

TECHNICAL DETAILS

Metal/metal butterfly valves for fumes and air	Materials zinc plated carbon steel, SS316
Tightness class III according to ANSI B 6.104	Max temp. DV0-2 200°C, max temp. DV4 400°C
Low pressure drops	Shaft seat: P.T.F.E. o graphite plate
Maintenance operations are limited to the traditional packing of the stem with an adjustable stubbing box	Suitable for flanges EN 1092-1:2001 PN 6, PN 10, PN 16, ANSI 150 RF
Standard series DN 50 - DN 300	Top flange according to ISO 5211

SIGHT GLASSES

SERIES W SIGHT GLASS

TECHNICAL DETAILS

Mount solder	Body in AISI 316L , seat in P.T.F.E.
Standard series from DN 50 up to DN 200	Completely demountable
TOUGHENED SODALIME disc, BOROSILICATE upon request	Tested glasses upon request
Circular sight glasses suitable for tanks and pipelines	T° Max : soda-lime 130°C - borosilicate 250°C

DIMENSIONS

04

BALL VALVES

SERIES TV TRUNNION BALL

The Ball Valves MEI are designed and built to shut-off liquid or gaseous fluids. Usually used materials for pressure containing parts consist of forged carbon steel, low-alloy steel, austenitic stainless steel etc.; if this material is not suitable for the fluid, Mei Valvole Industriali can provide different materials according to the Customer's requirements.

TECHNICAL DETAILS

The trunnion hinged ball side entry design that we use, gives more facility to handle, allowing to reduce the torque and the worn out of seats.	Anti-static (steel spring or ball) in according to API6D, guarantees electrical continuity between the parts (ball-stem or stem-gland flange).
Is available soft and metal seated valves.	Stem extension or Gland Flange extension on request.
Double o-rings to improve sealing.	Operation available with lever, gear or available with Actuator pneumatic or electric.

Our Valves are available Reduce Bore or Full Bore, from 1"1/2 to 12"x10".

The range Class is form ANSI 150 to ANSI 600, with different ends depending by the pressure.

OTHER CONNECTION UPON CUSTOMERS' REQUEST.
